PRIVACY PROTECTOR GDPR COMPLIANT

- Pixelation of fixed image areas
- automatic, AI-based removal or pixelation of objects (people, vehicles, etc.)
- separate presentation for builders and public relations
- Password protection with 2-factor authentication

BEFORE - AFTER

Compare and contrast freely selectable points in time from the image archive.

PREMIUM TIMELAPSE

In addition to automatically generated time-lapse films, we also supply hand-edited material for professional video productions.

This includes sorting out irrelevant construction sections and bad weather images, editing of several camera perspectives, virtual zooms and camera pans, smooth image transitions, and much more.

CAMERA SELECTION

THE RIGHT CAMERA FOR EVERY LOCATION

- robust outdoor system
- for every angle of view (up to 360°)
- resolutions up to 100+ megapixels
- low-light camera

SELF-SUFFICIENT SYSTEM

FOR LOCATIONS WITHOUT POWER AND INTERNET

- all-in-one systems or individual solutions
- battery supply with or without photovoltaic panel
- simple and quick relocation possible

COMPLETE SYSTEMS

INSTALL, CONNECT TO POWER, READY TO GO

- preconfigured for quick and easy installation
- control cabinet with mobile router
- wall or pole mount
- optional surface stand for easy installation

WEATHER STATIONS

FOR ASSESSING THE WEATHER CONDITIONS ON SITE

- current and precise measurements
- direct overlay onto the image possible
- 3-day weather forecast
- weather database incl. graphical display of archived data

BRING-YOUR-OWN-DEVICE

CLOUD SOLUTION FOR YOUR EXISTING CAMERAS

- manufacturer-independent
- uncomplicated integration
- upgrading the image quality of older cameras

DRONE FLIGHTS

IN ADDITION TO THE CAMERA

- aerial photos, orthophotos
- 360° spherical panorama (VR)
- GPS positioning
- 3D mapping / 3D point clouds
- digital surface model
